

# JumpStart Program

100 Women In Finance

Investing in the  
**Next Generation**

**JumpStart**  
100 Women In Finance

## Overview

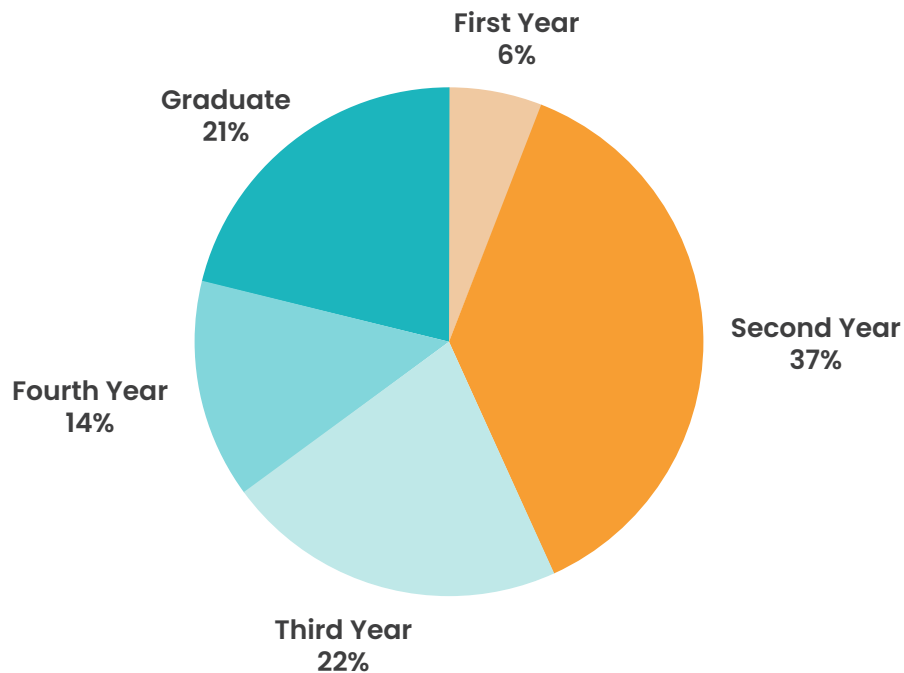

The 100 Women in Finance JumpStart Program is a multi-day virtual experience that provides college-age students with an introduction to the financial services industry and the opportunity to meet experienced professionals.

In many ways, JumpStart is exactly what the name suggests: an entry-point into the finance industry from which students can continue to build and explore. Throughout the course of the program, participants receive career guidance, industry information, interviewing and networking tips, and opportunities to interact with professionals, recruiters, and fellow students from around the world. The program is intended to serve as a pre-internship primer and is geared for students at any stage of their career exploration. Some may have already landed finance internships, while others are seeking guidance about where to begin their search.

Thanks to the generous support of our corporate partners and their commitment to access, we are proud to provide JumpStart free of charge to students.

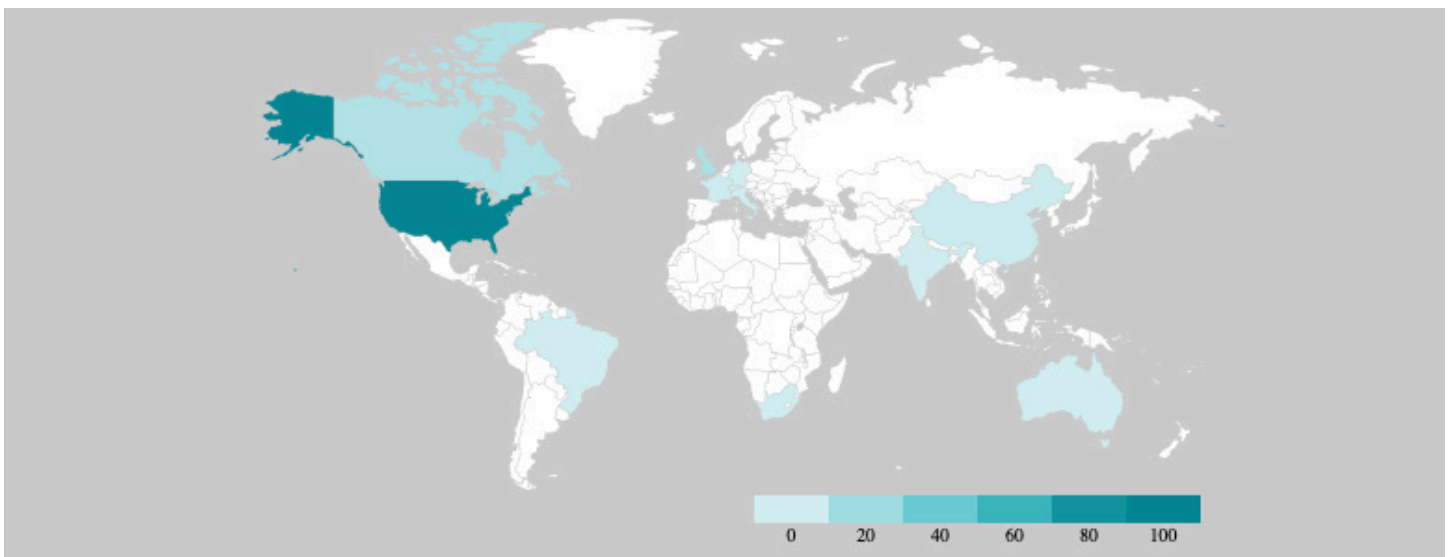

# Who Attends JumpStart?

*During 2021 programs, most students were in their second or third year of a 4-year degree.*

**65%** self-identify as students of color

*Students hailed from 92 different colleges across 15 countries.*

Jumpstart Program	

# What Students are Saying

Rated their knowledge of opportunities in the finance industry as "high" or "very high" before attending JumpStart

Rated their knowledge of opportunities in the finance industry as "high" or "very high" after attending JumpStart

Reported that they would recommend JumpStart to a friend

"I really enjoyed hearing each speaker's personal journeys given their extremely diverse backgrounds. I particularly liked when they broke down preconceived notions of being a woman in finance. Hearing their enthusiasm for their current job really motivates me to pursue finance in the future."

"This program was one of the most beneficial things that I have done towards preparing for my career. I learned so much from each speaker and look forward to applying this knowledge as I progress in my education and career."

"The most valuable part of JumpStart for me was getting to hear stories from a variety of people in the finance industry. I have felt that every finance professional that attended my university followed the same path to get to where they ended up. It was reassuring to hear that everyone's path will be unique."

"[The most valuable part of JumpStart was] seeing just how many other women my age are interested in a career in finance. I found it very empowering and welcoming to see people like me, especially women, pursuing such a powerful career path."

# Past Events
